Camp Creek

State Park

www.wvstateparks.com

CAMP CREEK STATE PARK was formed from Camp Creek State Forest in 1987, when a tract of approximately 550 acres was set aside to create this recreation area. Still adjacent to the park lies Camp Creek State Forest. Consisting of nearly 5,300 acres of forest land, this property is managed to demonstrate sound forest management principles through the concept of multiple use. A hunter will find many species of game including deer, native wild turkey, ruffed grouse and a variety of small game. Camp Creek, from which these areas take their name, is one of the best stocked trout streams in the area and can offer many hours of fishing enjoyment.
